Portfolio: [Abdullah Habashy | Data Analyst](#)

PROFESSIONAL SUMMARY

Data Analyst with 1 years of hands-on experience delivering freelance data analysis projects across diverse business contexts. Skilled in Microsoft Excel, Power Query, Power Pivot, Power BI, DAX, data modeling, KPI development, and interactive dashboard design. Experienced in cleaning, transforming, and analyzing data, building structured data models, creating custom measures, identifying trends and performance patterns, and translating findings into actionable recommendations. Currently expanding technical capabilities in SQL and Python.

TECHNICAL SKILLS

Business Intelligence: Power BI, interactive dashboards, KPI development, report development, data visualization

Data Preparation: Power Query, data cleaning, data transformation

Data Modeling: Table relationships, structured data models

Analytics: DAX, measures, trend analysis, performance reporting, actionable recommendations

Microsoft Excel: Pivot Tables, Power Pivot, VBA

Currently Developing: SQL, Python

PROFESSIONAL EXPERIENCE

Freelance Data Analyst | Independent | 1 Years

- Delivered end-to-end data analysis projects across diverse business domains.
 - Cleaned and transformed data using Excel and Power Query.
 - Built data models, table relationships, DAX measures, and business KPIs.
 - Developed interactive Power BI dashboards to track performance and trends.
 - Translated analytical findings into actionable insights and recommendations.

SELECTED DATA ANALYTICS PROJECTS

Project 1 - AutoVista Used Cars Dealership Analytics

Business Objective:

Develop an end-to-end business intelligence solution to analyze sales revenue, vehicle specification trends, pricing depreciation models, accident risk impact, and service history condition to optimize inventory purchasing and maximize profitability.

Tools:

Microsoft Power BI | Power Query | DAX | Data Modeling | Interactive Dashboards

KPIs:

Total Sales \$57.88M | Cars Sold 4,700 | Avg. Selling Price \$12.31K | Accident Rate 35% | Avg. Accident Price Drop \$9.27K | Automatic Transmission 84.88% | Avg. Horsepower 198 HP | Avg. Yearly Mileage 9,991

Key Insights and Recommendations:

Identified high revenue concentration in SUVs (\$31.65M) and Sedans (\$21.45M), heavy customer demand for automatic transmissions (84.88%), luxury brand performance led by Mercedes-Benz (\$9.8M), and severe vehicle price depreciation for cars with accident history (\$9.27K drop) and age exceeding 5 years. Recommended allocating ~80% of inventory purchasing budget to Automatic SUVs/Sedans, replacing flat price cuts on accident vehicles with a multi-tier inspection score, launching a Certified Pre-Owned (CPO) badge for full-service vehicles, and prioritizing marketing in top revenue states (Georgia, California, Texas).

Project 2 — PrimeAxis Trading Group Sales Performance Analysis

Business Objective:

Analyze sales performance, customer behavior, reseller performance, product profitability, and regional distribution to support strategic business decisions, improve profitability, and optimize sales operations.

Tools:

Microsoft Power BI | Power Query | DAX | Data Modeling | Azure Maps | Interactive Dashboards

KPIs:

Total Sales \$77M | Total Profit \$991K | Profit Margin 1.28% | Total Orders 3,052 | Active Resellers 566 | Total Resellers 701 | Lead Conversion Rate 80.74% | Total Products 397 | Total Quantity Sold 203K

Key Insights and Recommendations:

Identified low overall profit margin despite strong sales revenue, highlighted top-performing products and resellers, analyzed regional sales distribution and customer segments, monitored seasonal sales trends, and evaluated reseller activity. Recommended improving pricing strategy, optimizing procurement costs, expanding into high-potential regions, increasing reseller activation, and focusing on high-margin products to improve overall business performance.

Project 3 — [L.O. Technology Hr. Analysis]

Business Objective: Analyze employee salary and experience data to identify compensation patterns, departmental differences, and workforce trends.

Tools: Microsoft Excel | Pivot Tables | Pivot Charts | Data Analysis | Interactive Dashboard

KPIs Total Employees 40 | Average Annual Salary \$55,150 | Highest Salary \$75,000 | Lowest Salary \$40,000 | Average Experience 3.43 Years

Key Insights and Recommendations: Identified salary variations by department and designation, top-paid employees, and experience patterns across departments. Recommended reviewing compensation gaps and using salary-experience trends to support workforce planning and HR decisions

Project 4 — AMH Pharma Logistics HR Analysis

Business Objective: Analyze workforce payroll, attendance, employee demographics, experience, education levels, and performance across company locations to support HR planning and workforce decisions

Tools: Microsoft Excel | Power Query | Pivot Tables | Pivot Charts | Interactive Dashboard

KPIs: 94 Employees | Total Payroll EGP 1,248,578 | Avg. Payroll EGP 13,283 | Avg. Attendance 76% | Performance Change -11.29% | Avg. Experience 11.36 Years | Avg. Employee Age 47

Key Insights and Recommendations: Identified payroll differences across locations and job functions, workforce distribution patterns, experience variations, and performance changes. Recommended investigating the negative performance trend, reviewing attendance gaps, comparing payroll differences by location and role, and aligning workforce planning with employee experience and staffing distribution

Project 5 — Hospital Record Analysis

Business Objective: Analyze hospital patient outcomes, mortality patterns, risk categories, and monthly death trends to support healthcare performance monitoring and identify periods requiring further investigation.

Tools: Microsoft Excel | Pivot Tables | Pivot Charts | Slicers | Interactive Dashboard | Data Analysis|

KPIs: 403 Total Cases | 334 Live Cases 83% | 69 Death Cases 17% | High-Risk Cases 45% | Low-Risk Cases 55%

Key Insights and Recommendations: Identified monthly mortality fluctuations, cumulative death patterns, differences between high- and low-risk cases, and periods of sharp mortality growth. Recommended investigating months with significant mortality increases, monitoring high-risk cases more closely, and using monthly trend analysis to support resource planning and targeted clinical review

Project 6 — AMH Business Performance Analysis

Business Objective: Analyze sales, product performance, customer behavior, and inventory distribution to evaluate profitability, identify growth drivers, and support commercial decision-making

Tools: Power BI | Power Query | DAX | Data Modeling | Interactive Dashboards

KPIs: \$155M Total Sales | \$97M Total Cost | \$58M Total Profit | 37.4% Profit Margin | 7,991 Orders | 68K Units Sold | 50 Customers | 15 Products

Key Insights and Recommendations: identified sales and profit trends, top-performing products and customers, channel contribution, customer segments, and inventory distribution across warehouses. Recommended protecting high-value customers, prioritizing top-performing products, investigating the 2019 profit decline, and optimizing inventory allocation based on product demand and channel performance

Dashboard Link: [Click Here](#)

Project 7 — Nova Medical Center Healthcare Analytics

Business Objective: Develop an end-to-end healthcare analytics solution to evaluate patient demographics, clinical severity, hospital operations, revenue performance, payment collection, and departmental efficiency.

Tools: Power BI | Power Query | DAX | Data Modeling | Interactive Dashboards

KPIs: 1,000 Patients | \$8M Total Bill Amount | \$2M Paid Revenue | \$580K Pending Amount | 29% Collection Rate | 5 Days Avg. LOS | 135 Beds

Key Insights and Recommendations : Identified revenue concentration in Orthopedics and Cardiology, pending-payment exposure, patient demand patterns, LOS variations, and operational capacity trends. Recommended improving collection efficiency, prioritizing high-revenue departments, monitoring high-risk patient groups, optimizing bed utilization, and reviewing high-LOS departments for operational bottlenecks

Head of Examination System and Control Committee | Private Schools Group | Alexandria, Egypt – 2021 till now

- Lead examination control operations and manage student assessment records.
 - Coordinate committee workflows to ensure accuracy and timely processing of results.
 - Review records and outputs to identify inconsistencies and reduce reporting errors.
 - Prepare structured reports while maintaining data accuracy and confidentiality.

EDUCATION

Bachelor of Education | Alexandria University | Natural Sciences and Chemistry | 2009

CERTIFICATION AND PROFESSIONAL DEVELOPMENT

- **Professional Training Certificate** — Growth Level Center. Completed the first stage of training in Microsoft Excel and Power BI.
- **Coursework:** Microsoft Excel, Power BI. Currently studying SQL and Python.
